President Report
September–October 2026

During September and October, I continued to carry out my responsibilities as President of CUPE 3906. I attended the Injured Workers Conference, Executive meetings, and committee meetings. I also participated in meetings with the National Representative and union staff to discuss ongoing union matters and coordinate work. In addition, I carried out presidential signatory duties and responded to emails and other communications related to union business.

A significant part of my work during this period involved supporting members and addressing their concerns. We met and coordinated with Students against Austerity group. I responded to individual member inquiries, held one-on-one meetings, and met with stewards to discuss concerns raised by members. I also continued to work with stewards, the Executive, committees, and union staff to ensure members' concerns received attention and appropriate follow-up.
