

Lead Steward Unit 1 Report – March 2026

I held a Teaching Assistant orientation for the DeGroot Business School, where I presented Teaching Assistant rights, our responsibilities toward them, and how the union can support them. In addition, I organized a training session for new steward members and held a committee meeting with the existing stewards. During this meeting, I provided updates on news related to the different Units and facilitated an open discussion about concerns and challenges that members in their departments have been facing.

I have shared the updated members list with stewards whom I know are currently active, and will share it with the remaining stewards once the steward list has been fully updated. I have also been responding to and following up on emails received from members.

In addition to steward-related work, I attended the Executive meetings, the General Membership Meeting, and the Benefits Committee meetings.

Overall, this month has been productive. We made good progress with steward training, communication, and engagement with members across departments. I will continue supporting stewards and working to address members' concerns in the coming weeks.

Mohsen Chegini
